

(a) Entropy conservation (insulating, no conduction)

(b) Energy budget (grey-body cooling)

 (c) Grey-body cooling ($S_0 = 10,000$ J/kg/K)

(d) Convective homogenization (no conduction)

 (e) T-P profiles (solid: $N=50$, dashed: $N=100$)

 (f) P-S profiles (solid: $N=50$, dashed: $N=100$)
